UCLL, Leuven — *Bachelor of Applied Informatics*

SEPTEMBER 2016 - PRESENT

Major in software development

Athénée de Luxembourg, Luxembourg — *International Baccalaureate Diploma Programme*

SEPTEMBER 2012 - MAY 2016

PROJECTS

AI project using Spacy

In a team of 3 students, I developed an application that can read through documents and discover names, dates, company names, etc. The work consisted of labelling data, training an AI, developing a frontend and dockerization.

Development, maintenance and hosting of discord bots

I maintain and host several self-developed bots that use discord to handle asynchronous requests. The discord.py API library is used to achieve this.
